

Maderas

MAPLE

Libra por libra es la madera mas dura y mas densa, mientras mas dura sea la superficie, La pelota saldrá despedida con mayor potencial al contacto.

Un bate de MAPLE es sinónimo de PODER.

Opción preferida por los jugadores profesionales.

WHITE ASH / FRESNO BLANCO

Reconocido por su flexibilidad y ligereza, produce un efecto “trampolín” al contacto con la pelota, proyectándola con gran fuerza.

Bate sumamente resistente, ofrece mayor control del swing y mas margen de error.

Opción popular en jugadores de todos los niveles.

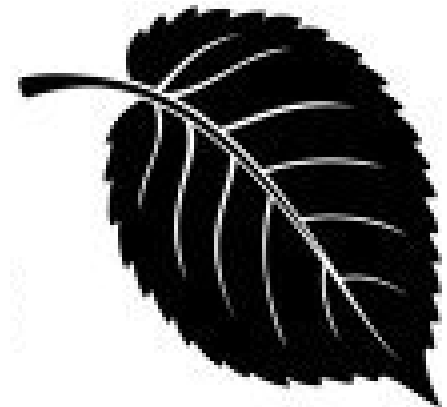

ABEDUL AMARILLO / YELLOW BIRCH

Combinación perfecta entre la dureza del maple y la flexibilidad del fresno blanco.

Bate que genera poder y al mismo tiempo permite control del swing.

Cada vez mas popular entre los jugadores profesionales.

World Baseball Classic 2017

To: All Federation Teams
From: Roy Krasik, Major League Baseball
Date: January 30, 2017

2017 World Baseball Classic Bat Supplier Request Form

The Federation Team identified below would like permission for the following bat supplier to supply bats for all games, practices and exhibitions in connection with the World Baseball Classic Tournament. The bat supplier identified below is not on Major League Baseball's 2017 list of approved bat suppliers.

Please return the completed bat supplier request form by e-mail to Roy Krasik at roy.krasik@mlb.com on or before **Thursday, February 9, 2017**. The form submitted after that date will not be accepted. All Federations will be notified of any additional bat suppliers, approved for use, on or before February 14, 2017.

Requesting Federation Team: Mexico
Recommended non-approved 2017 MLB Bat Supplier: VALMA Baseball Bats

Following is to be completed by the bat supplier:

Non-Approved Bat Supplier's Corporate Contact Information:

Main Contact: **Alejandro Villarreal**
Address: **Blvd. Rosales 2726** City/State/Zip: **Los Mochis, Sinaloa, Mexico 81210**
Email: **alexvgvg@me.com** Phone: **0052(668)4645494** Website address: **valmabats.com.mx**

- Number of years the non-approved bat supplier has been manufacturing bats: 0.5 years
- Identify the allowable wood species (see list on page two) that will be provided to Player -
Sugar maple White ash Yellow birch
- Provide a photo of the bat, with the supplier's name and trademark on the bat visible

If approved, the bat supplier hereby agrees to conform to the following bat guidelines as described in the 2017 World Baseball Classic Rules and Regulations:

Approved Bats. Any bat supplier approved for Major League Baseball play in 2017 shall be approved for WBC Tournament play. In addition to the requirements of Official Baseball Rule 3.02, any bat model approved for Major League Baseball play shall be approved for Tournament play. Any bat supplier not approved for MLB play shall be submitted to WBCI for approval before it is used in a Tournament game. WBCI shall impose criteria on the size and placement of manufacturers' trademarks on bats, color of

bats, wood species and other characteristics that are substantially similar to the criteria used for Major League Baseball play, which in part includes:

Bat Supplier Name and Trademarks. Suppliers' names, marks and rings are permitted to appear in only one area of the bat. The name and mark appearing on the bat must be of the company that manufacturers or markets the bat and may not be the name or mark of another company or product. This area is not to exceed four inches in length or two inches in height, and must not start closer than 18 inches from the knob end of the bat. A two-color bat must be divided into two sections, each one solid color. The dividing point between each of the color sections must be 18 inches from the knob end of the bat. Deviation from this rule may be approved in the discretion of WBCI.

Wood Grain. The wood grain of a bat must be clearly visible, in order to determine compliance with Official Baseball Rule 3.02(a).

Wood Species. Ring and semi-ring-porous woods (such as, ash, the oaks, hickory and elm) must have the supplier's name and mark placed on the face-grain surface of the bat. Diffuse-porous woods (such as sugar maple and yellow birch) must have the supplier's name and mark placed on the edge-grain surface of the bat. The wood species used shall be clearly defined on the bat. It is recommended that a letter prefix to identify the wood species be placed at the end of the model number.

The only permitted wood species include the following; True hickory, white ash, sugar (hard) maple, yellow birch, red oak, tamo (Japanese ash), aodamo (Japanese ash) and European Beech.

Bat Colors. The only Authorized colors are: natural finish of either clear or no finish that does not resemble a white finish; brown-based wood stain that does not resemble red; black-based wood stain; dark gray-based wood stain; and half stain with natural or clear finish that does not resemble a white finish, combined with either brown-based or black stain.

The undersigned has read the foregoing World Baseball Classic Bat Supplier Regulations and agrees to each of the sections as described above.

Re: WBCI Bat Approval List and Regulations – FINAL

In addition to the MLB approval the following bat suppliers may be used during the World Baseball Classic as requested by the Federation Teams and approved for use:

Adidas	Gold	NIKE	Valma
BON	Hard Sports	SOKO	Yanase
Descente	Kubota	Under Armour	Zett

WBC Bat Regulations:

Approved Bats. Any bat supplier approved for Major League Baseball play in 2017 shall be approved for WBC Tournament play. In addition to the requirements of Official Baseball Rule 3.02, any bat model approved for Major League Baseball play shall be approved for Tournament play. Any bat supplier not approved for MLB play shall be submitted to WBCI for approval before it is used in a Tournament game. WBCI shall impose criteria on the size and placement of manufacturers' trademarks on bats, color of bats, wood species and other characteristics that are substantially similar to the criteria used for Major League Baseball play, which in part includes:

Bat Supplier Name and Trademarks. Suppliers' names, marks and rings are permitted to appear in only one area of the bat. The name and mark appearing on the bat must be of the company that manufactures or markets the bat and may not be the name or mark of another company or product. This area is not to exceed four inches in length or two inches in height, and must not start closer than 18 inches from the knob end of the bat. A two-color bat must be divided into two sections, each one solid color. The dividing point between each of the color sections must be 18 inches from the knob end of the bat. Deviation from this rule may be approved in the discretion of WBCI.

Wood Grain. The wood grain of a bat must be clearly visible, in order to determine compliance with Official Baseball Rule 3.02(a).

Wood Species. Ring and semi-ring-porous woods (such as, ash, the oaks, hickory and elm) must have the supplier's name and mark placed on the face-grain surface of the bat. Diffuse-porous woods (such as sugar maple and yellow birch) must have the supplier's name and mark placed on the edge-grain surface of the bat. The wood species used shall be clearly defined on the bat. It is recommended that a letter prefix to identify the wood species be placed at the end of the model number.

The only permitted wood species include the following; True hickory, white ash, sugar (hard) maple, yellow birch, red oak, tamo (Japanese ash), aodamo (Japanese ash) and European Beech.

Bat Colors. The only Authorized colors are: natural finish of either clear or no finish that does not resemble a white finish; brown-based wood stain that does not resemble red; black-based wood stain; dark gray-based wood stain; and half stain with natural or clear finish that does not resemble a white finish, combined with either brown-based or black stain.

If you have any questions please contact Roy Krasik either by e-mail roy.krasik@mlb.com or by phone 212-931-7869 or Garrett Horan at 212-931-7639 or by e-mail garrett.horan@mlb.com.

The following list identifies only those bat suppliers who are approved to have their bat used during any World Baseball Classic game, practice or exhibition.

MLB Approval List as provided in the memorandum dated January 30, 2017:

1	Alomar Baseball	18	Max Bat
2	Anchor Bat Company	19	Mizuno
3	Asics	20	Old Hickory Bat Company
4	Axis Sports	21	OTW Bats

Modelos

AP5

Nuestra replica del modelo originalmente creado para el legendario Albert Pujols. Se caracteriza por su excelente balance que permite un fácil manejo y máxima velocidad de swing.

Mango: Medio

Barril: Grande

Jugadores para quien lo hemos producido: Jonny Jones (Vaqueros Laguna) José Vargas (Rieleros de Aguascalientes)

C374

Modelo bien balanceado, su transición mango-barril media permite excelente control de swing sin sacrificar poder.

Mango: Delgado

Barril: Grande

Jugadores para quien lo hemos producido: Joey Meneses, Ramiro Peña, Ismael Salas (Tomateros de Culiacán).

Modelos

CU26

Nuestra replica del modelo originalmente creado para Chase Utley.

Lo caracteriza un mango delgado y barril chico/medio pero con una transición mango-barril marcada.

Bate tremendamente sólido.

Mango: Delgado

Barril: Chico/Medio

Jugadores para quien lo hemos producido: Amadeo Zazueta (Acereros de Monclova)

HAPER47

Modelo original de VALMA Bats creado para el Mochitense Juan Carlos “Haper” Gamboa.

Caracterizado con por una empuñadura gruesa y acampanada, combinada con un barril medio logran máxima velocidad de swing y excelente control.

Mango: Medio/Grueso

Barril: Medio

Jugadores para quien lo hemos producido: Juan Carlos “Haper” Gamboa, Rodolfo Amador

VMA243

Quizá el modelo más popular en todo el beisbol.

Su barril extra grande y mango delgado/medio logran gran poder y al mismo tiempo suficiente control de swing.

Estas características lo hacen el bate preferido del bateador de poder por excelencia.

Mango: Delgado/Medio

Barril: Extra grande

Jugadores para quien lo hemos producido: Wellington Dotel, Marco Tulio Jaime, Alex Valdez

VMA271

Otro modelo sumamente popular en el beisbol.

Su mango y barril medios, combinados con una transición mango-barril perfectamente equilibrada, logran uno de los bates mas balanceados en le mercado.

Preferido por bateadores de contacto, pero también por bateadores experimentados que buscan máximo balance y control.

Mango: Medio

Barril: Medio

Jugadores para quien lo hemos producido: Luis Alfonso García

KA29

Modelo caracterizado por su barril alargado, ideal para bateadores que no huyen de los lanzamientos pegados.

Permite un mayor margen de error al contacto y su transición mango-barril pronunciada produce poder sin sacrificar control.

Mango: Delgado

Barril: Grande

Jugadores para quien lo hemos producido: Ramiro Peña, Oscar Robles, Alex Liddi

VMA110

Modelo con una transición mango-barril perfectamente equilibrada, lo cual permite máximo control, pero su mango delgado y barril grueso también atraen a bateadores de poder que buscan balance y control de swing.

Mango: Delgado

Barril: Grande

Jugadores para quien lo hemos producido: C.J. Retherford, Brian Hernández

Modelos

J143

Modelo caracterizado por su empuñadura delgada y una transición mango-barril media, lo cual logra buen equilibrio y control pero también genera poder.

Mango: Delgado

Barril: Grande

Jugadores para quien lo hemos producido: J.C. Lineares, Brian Hernández

VMA174

Combina un cañón largo con un mango delgado; transfiriendo la mayor parte del peso hasta el final.

Típicamente buscados por los poderosos bateadores de hoy en día que desean los bates cargados al final con mangos delgados como "látigos".

Mango: Delgado

Barril: Grande

Modelos

VMA141

Es utilizado por todo tipo de bateadores (individuales, gap o power) y es un modelo clásico similar a un T141.

Este modelo presenta un barril extra largo con una transición lenta al mango.

Una gran opción en Maple o Birch, y se fabrica utilizando palanquillas de alta densidad.

Mango: Medio

Barril: Largo/Medio

VMA356

Diseñado para jugadores de poder y contacto, una gran combinación entre el modelo **VMA174 Y VMA243.**

Mango: Mediano

Barril: Largo

Knob: Pequeño

C4

Para el Campeón del Mundo y para el campocorto MVP Jimmy Rollins cuando estaba buscando un bate de cañón grande que tuviera poder explosivo para depositar bolas sobre la cerca o en los callejones de poder.

Mango: Medio

Barrel: Grande

VMAi13

El diseño VALMA BATS de este popular modelo ayuda al gran barril a atravesar la zona. Uno de los modelos más populares en casas club profesionales.

Mango: Medio

Barril: Grande

CB15

Combina un barril grande con un mango delgado, y el resultado es poder durante días. El bate de madera CB15 Pro Model hace precisamente eso, dando a los bateadores de poder la sensación de carga final que necesitan para sacar los patos del estanque y correr sobre el diamante.
